# CasePlano

[www.unibind.com](http://www.unibind.com)

The CasePlano is a cardboard wrapped with a paper coated with a thin layer of hot melt on its outside and the interior borders. Unibind has developed the CasePlano to manufacture a nicely finished and personalized Hardcover, RingBinder or Display without the use of liquid glues, in small or large quantities.

## Finishing material to be used together with the CasePlano:

- The cover material is wrapped around the outside of the CasePlano, it can be individually personalized prints, linen -, leather – or simili-leather sheets.
- The CaseMirror is used to finish the inside of the CasePlano, it is a paper coated with the same thin layer of hot melt as the CasePlano.

## Benefits

- Completely dry concept: no need to handle liquid chemicals or glues. This avoids extra labour time for cleaning, daily maintenance, safety compliances and other. The applied hot-melt is free of animal glue.
- Tight tolerances resulting in uniformity of production output thanks to automation of the finishing process.
- Sizes range from a minimum size of 4 x 4", over A4/ Letter Size Landscape and portrait to a maximum size of 12 x 12".
