MOCA

DIRECT CARD PRINTER

Espresso's little brother the Moca is a compact and powerful desktop ID card printer, that is like the Espresso a brainchild of Italian design & engineering and reflects German reliability in consistent performance. It offers its users great value and versatility with high print speed and superior print quality. With its robust and durable construction, the Moca looks and works great in any office or card production environment.

The Matica® Moca is a single side desktop ID card printer providing the user with a very good level of features and options and comes in a bright white housing.

The entire line offers optional WiFi connectivity making printing and encoding convenient and trouble-free. You can easily define your printer and choose the one that perfectly matches your current needs, as Moca offers some valuable options.

The new printer line works perfectly for a wide variety of applications such as Employee and Membership ID Badges, Service and Benefits Cards, Gift and Loyalty Cards, Access Control Cards, Student IDs, Transit Cards, and more!

LED status indicators on the front of the printer allows you to monitor the card production process at a distance, and the blue LED light on the card hopper door keeps you aware of your card input availability in real time.

Each printer comes with an optional rear output hopper to catch full card runs as needed, which can improve the throughput speed in higher volume scenarios. In standard setup, having front-side input and output trays is also convenient for situations where space is limited, such as on a desktop, in a cabinet or under a counter. Each Moca printer also has the option for inline magnetic stripe encoder, to extend its functionality for a broader set of application uses.

TECHNICAL SPECIFICATIONS

Print method

Color dye sublimation or monochrome thermal transfer printer

Print mode

Single side edge-to-edge

Print resolution

300 dpi

Print speed

Monochrome: up to 500 cph

Full color: up to 150 cph

Encoding options

Magnetic stripe encoding: 3 tracks HiCo/LoCo

Card compatibility

PVC, Composite PVC, ABS (varnished)

ISO CR80 - ISO 7810 (53,98 x 85,60 mm)

0,25 - 1,25 mm (10 - 50 mil)

Card hoppers

Input hopper: 100 cards / 0.76 mm

output hopper: 30 cards

reject bin: optional

Card feeder

Automatic

Connectivity

USB 2.0 high speed

WiFi as an option

Supported operating systems

Windows XP SP3, Vista, 7 and 8 32-64 bit

Software

Matica Printer Driver and Printer Manager

Matica Software suite (GO edition)

Consumables

Matica Genuine Consumables

Printer dimensions (L x W x H)

395 x 200 x 250 mm
